Goliad

Ben said the original proposal for decision of the ALJ, for consideration of the TCEQ Commissioner's, may have been modified.

Originally the advice was to remand the application back to the applicant for further investigation of a fault's transmissivity, or deny the permit.

The TCEQ ED provided comment and now Ben thinks the ALJ recommendation proposes to:

remand the application back to the applicant for further investigation of a fault's transmissivity, or follow the recommendation of the ED and find that no further investigation of the fault is necessary.

Ben was going to verify his recollection and will call or email me if it is not as proposed.

In either case, the Commissioner's are scheduled to hear the ALJ's proposal on December 14th.

EPWU

The TCEQ call on EPWU is still on, 1 -1:45 pm on 12/7. They are going to call us in the Red River Room. Richard Hyde, Deputy ED is expected to be on the call.

Thanks

Ray Leissner, Env. Eng.
